

The focus is exceptional vision for patients

New innovations offer improved eyesight to many previously excluded

Dr. John Blaylock, Ophthalmologist.

Valley Laser Eye Centre is a premier vision care clinic founded by the highly skilled LASIK and cataract surgeon, Dr. John Blaylock. The center offers comprehensive, premium eye care services for patients throughout BC.

Boasting state-of-the-art medical technology and surgical facilities, Valley Laser Eye Centre employs the talents of certified nurses, technicians, and support staff to maintain strict standards in all areas of eye health care and patient service. Dr. Blaylock and his

team are trained in a variety of innovative procedures, including IntraLASIK vision correction, PRK laser surgery, the ReSTOR VISION PROCEDURE™, the Verisyse procedure and cataract surgery. Dr. Blaylock combines extensive medical training and the use of cutting-edge technology to provide patients with optimal visual results.

With an established history of excellence in eye care, Valley Laser Eye Centre is committed to providing each patient with exceptional vision. Dr. Blaylock and his staff meticulously

examine each patient to determine the best option for vision correction surgery.

Dr. Blaylock uses advanced IntraLASIK laser technology to correct nearsighted, farsighted, and astigmatic patients. IntraLASIK is a 100% blade-free surgical procedure developed as an innovative alternative to traditional LASIK, offering a consistently high rate of safety and success. IntraLASIK laser technology individually reshapes the cornea to enhance and correct vision, reducing or eliminating a patient's dependency on glasses or contact lenses.

Dr. Blaylock also offers the latest advances in intraocular lens surgery technology using a variety of intraocular lens implants, including ReSTOR, Verisyse, and AcrySof lenses. These lenses offer cataract patients and those wearing bifocals or tri-focals or experiencing reading vision problems, the opportunity to enjoy superior visual acuity.

Widely considered to be a pioneer in the ReSTOR Vision Procedure (a multi-focal lens

implant to correct distance, near, and intermediate vision) Dr. Blaylock developed a unique method for intermediate visual optimization with the ReSTOR Lens. He received international recognition for this procedure, now trademarked as the "Blaylock Procedure.™"

More about Dr. John Blaylock...

John Blaylock, MD, FRCSC, is a board-certified ophthalmologist and medical director of Valley Laser Eye Centre. He earned his medical degree from the University of Ottawa School of Medicine before completing a comprehensive internship through Mount Sinai Hospital in Toronto. He completed his residency in internal medicine through Ottawa Civic Hospital and subsequent residency in ophthalmology through the University of Ottawa.

After his formal education and training, Dr. Blaylock entered private practice in 1988. In addition to Valley Laser Eye Centre, Dr. Blaylock maintains Blaylock Surgical Centre, a private surgical facility

providing plastic and cosmetic procedures, orthopedic, general and dental surgery, gynecology and urology procedures.

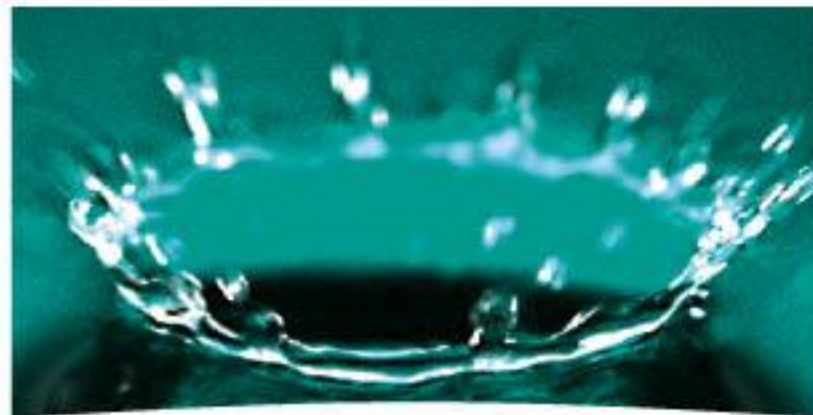

Dr. Blaylock stays on the cutting edge of new advances in vision correction surgery. He serves as an investigator in clinical trials where new techniques are developed and refined. One of his primary focuses is correcting presbyopia.

Dr. Blaylock is a distinguished member of a number of professional medical societies, including the Royal College of Physicians and Surgeons British Columbia, the Canadian Ophthalmological Society, the BC Society of Eye Physicians and Surgeons, the Canadian Society of Cataract and Refractive Surgery, the American Academy of Ophthalmology, and the American Society of Cataract and Refractive Surgery. Moreover, Dr. Blaylock is a Fellow of the Royal College of Physicians and Surgeons of Canada.
